

Status Instruments Ltd REACH Declaration

To whom it may concern;

REACH Regulation (EC) No 1907/2006 Declaration:

Status Instruments Ltd located at Status Business Park, Gannaway Lane, Tewkesbury, Gloucestershire, GL20 8FD, United Kingdom, hereby declares to the best of their knowledge all product or packaging supplied unless specifically stated otherwise do not contain any of the Substances of Very High Concern (SVHC) in a concentration by weight allowable limit specified on the REACH candidate list as of the latest update on 7th July 2017.

After review of the legislation and most notably the definition of an "article" as defined in EC Regulation 1907/2006, Title II, Chapter 1, Article 7.1 (a) and (b), it is within the view of Status Instruments Ltd that our products are considered "articles." However, according to the definition in §7.1 (b), registration of an article is only required if it contains a named substance that "is intended to be released under normal or reasonably foreseeable conditions of use," Status Instruments Ltd.'s analysis is that these products constitute non-registerable articles for their intended use.
