

Quality Policy

Status Instruments Ltd. has a policy of continuous development and improvement of its products together with its manufacturing and quality systems with the following objectives:

- To monitor and enhance customer satisfaction.
- To monitor and improve the efficiency of our manufacturing operations.
- To ensure that all our products comply with relevant current legislation, EU and Atex directives.
- To develop the skills and abilities of our employees through appropriate education and training.

The organisation and structures laid down in the company's Quality Manual are designed to meet these objectives and all personnel are expected to enthusiastically and energetically support them and to assist with their implementation.

The quality policy is reviewed annually at the Quality Management Review meeting to ensure its continued suitability and is placed on the company noticeboards.

A handwritten signature in blue ink, appearing to read "I Pullin", with a long horizontal flourish extending to the right.
